<p>Statistical Method: The log transformed PK parameter values of C_{max}, AUC_{0-24} and $AUC_{0-\infty}$ were subjected to ANOVA using GLM procedure. 90% confidence intervals of the difference between test and reference means were calculated to test the two-one sided hypotheses for concluding bioequivalence. The statistical analysis was carried out for pharmacokinetic parameters of Trimetazidine using SAS Version 9.1.3.</p> <p>SUMMARY - CONCLUSIONS</p> <p>Primary Pharmacokinetic Parameters:</p> <p>Trimetazidine</p> <p>Average of PK parameters of two periods of Test and Reference Formulation</p>
